ELLEGELLE Machinery

CONSTRUCTION AND SALE OF STAINLESS STEEL WASHING MACHINE

TUNNEL Continuous washing plant with screw conveyor series TCL

Automatic single-stage / multi-stage tunnel with screw conveyor.

Washing takes place in several stages that can be configured according to the geometry of the pieces. Electrical panel with PLC TOUCH SCREEN:

- Immersion wash
- Immersion wash with flux
- Spray washing with high impact blade nozzles
- Rinsing with mains water or demineralised water.
- Air blade drying

The water and detergent washing solution is collected in the loading tank and reused until its complete exhaustion. The washing temperature reaches 60°/80°C with minimum energy expenditure thanks to the complete insulation paneling, and it is a guarantee of an excellent result in washing even dry grease with considerable resistance. This temperature facilitates a quick drying of the piece.

Optional:

- Coalescence oil separator
- Ultrafilter up to 100 to 5 microns
- Emptying pump
- Automatic water filling with detergent dispenser
- Automatic piece loading / unloading system

TECHNICAL DATA: Customizable at customer's request
